Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party laod or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.

Each line above represents a notification of temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be re-designated at the conclusion of HE24. PNM states that for re-designation, each resource specified herein is currently a designated resource and each resource satisfies the following conditions: (a) PNM owns the resource, has committed to purchase power pursuant to an executed contract or has committed to purchase generation where execution of a contract is contingent upon the availability of network transmission service under the OATT, and (b) the Network Resource does not include any resources, or any portion thereof, that is committed for sale to non-designated third-party load or otherwise cannot be called upon to meet the PNM Network Load on a non-interruptible basis. For the redesignation of the resource, PNM incorporates by reference the unchanged information previously submitted to PNM and APS for the original designation of the resource.
