6	Number of Designated Network Resource Termination Forms Denied	0	0	0	0	0	0	0	0	0	0	0	0

These metrics are provided in compliance with FERC Order 890-A. PGE believes that the designation of a network resource, in and of itself, is not a transmission service request. Transmission service requests associated with Designated Network Resources are the Firm Network reservations identified on the Production Node of this OASIS. Metrics for Firm and Secondary Network reservations may be found on the Reservations Summary page.
