Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.

Each line above represents a request for temporary undesignation of designated network resource status, as described in Order 890. The amount of MWs being undesignated is shown for each hour with a non-zero entry. The full capacity of the resource should be considered designated for all hours shown with a zero, and shall be redesignated at the conclusion of HE24. By submitting this form, APS Marketing and Trading (APS M&T) states that each resource specified for temporary un-designation herein is currently a designated resource and: (a) APS M&T owns the resource or has committed to purchase power pursuant to an executed contract, and (b) the resource does not include any capacity that is committed for sale to third party load or otherwise cannot be called upon to meet the APS M&T's Network Load or retail native load. For the redesignation of the resource, APS M&T incorporates by reference the data previously submitted to AZPS for the original designation of the resource.
