Large Generator Interconnection Queue Cluster Window Notice

In accordance with the provisions set forth in Section 4.2 of Attachment O (LGIP) of APS' Open Access Transmission Tariff, APS has elected to evaluate Large Generator Interconnection Requests utilizing clustering, for the purpose of conducting the Interconnection System Impact Study. APS' annual Queue Cluster Windows shall be as follows:

April 1st through September 30th
October 1st through March 31st

The first Queue Cluster Window will begin October 1, 2004

This Notice is effective April 1, 2004. Any changes to these clustering periods shall become effective upon 180 days prior notice.

NOTE: APS will proceed with the System Impact Study in accordance with Section 7.4 of the LGIP for all Interconnection Requests in which an Interconnection System Impact Study Agreement has been executed during the Queue Cluster Window.
