

**Application Requirements for New Network Customers, or Network
Resources: Section 29.2 of the
Company's Open Access Transmission Tariff**

February 28, 2008

Application Procedures: An Eligible Customer requesting service under Part III of the Tariff and each existing Network Customer seeking to designate a new Network Resource must submit an Application to the Transmission Provider as far as possible in advance of the month in which service is to commence. Unless subject to the procedures in Section 2 of the tariff, a completed application shall include information provided per Section 29.2 of the tariff. Prior to the implementation and testing of the automated OATI tools, DNR and Network Service applications shall be submitted to the Transmission Provider via e-mail or facsimile. The DNR Attestation form can be found on the transmission providers OASIS.

The Transmission Provider (TP) shall post on its OASIS a list of all of the on-system and off-system Designated Network Resources. The TP will be posting this information manually until such time as OATI has implemented and verified the accuracy of its proposed automated posting program.
