Footnotes:

* Although SEPA is a Network Customer, the loads that are entitled to power from SEPA have all been designated as network loads of other network customers. Thus, including a "Capacity to be Designated as a Network Resource" amount would be duplicative of such other network loads that include their SEPA entitlements as part of their "Capacity to be Designated as a Network Resource." For network customers that are entitled to SEPA power, their entitlement from SEPA may be: listed as a DNR or it may not be listed because such entitlement has been assigned to another power supplier who treats the SEPA power as part of its own portfolio.
