

**Georgia Transmission Corporation  
NERC Reliability Standard MOD-004-1 (Capacity Benefit Margin)**

**Declaration Statement**

Pursuant to NERC Reliability Standard MOD-004-1 Capacity Benefit Margin (“CBM”), Transmission Service Providers (“TSP”) that maintain CBM are required to prepare and keep current a “Capacity Benefit Margin Implementation Document” (“CBMID”). Georgia Transmission Corporation (“GTC”) hereby declares that it does not maintain any CBM and uses the value of zero for all instances. When CBM is not maintained, NERC Reliability Standard MOD-004-1 does not require a TSP to have a CBMID.
