JANUARY 29, 2014

TO: ALL CLUSTER 1 PARTICIPANTS:

Pursuant to Section 7.6 of the Imperial Irrigation District ("IID") Generator Interconnection Procedures, IID hereby notifies all Interconnection Customers in Cluster 1 that a re-study of the Interconnection System Impact Study is required due to the withdrawal of 166 Megawatts of proposed generation from the Cluster. In addition, IID is required to issue notices of default and provide opportunities to cure for projects with proposed generation of 413 MW.

IID proposes to conduct the required System Impact re-analysis in parallel with the Interconnection Facilities Study for the remaining Interconnection Customers which have executed Interconnection Facilities Study Agreements with IID.

We will provide further information regarding the next study phase as soon as it is available.

We sincerely appreciate your cooperation in this matter and look forward to continuing to work towards interconnecting new generation to the IID grid.

Sincerely,

Kelli Fitzgerald
Interim Interconnect Contract Specialist, Sr.
