

## **Release of Idaho Power Data Including Critical Energy Infrastructure Information**

Idaho Power will not release infrastructure information, including CEII, to any requestor unless the request is approved by an authorized Idaho Power employee. Idaho Power will evaluate the intent of each request for CEII and will determine whether to release the information to the requestor. Idaho Power will require the execution of a Non-Disclosure Agreement from such requestors.

Idaho Power has defined CEII as the following, but not limited to:

- Transmission conductor details
- Transmission structure design details
- Planned or expected transmission outages critical to the system
- Substation design details
- Control center locations or design details
- Power plant facility design details
- Geographic coordinates more specific than line routes
