**Pacific DC Intertie
Sylmar Replacement Project:
Outage Schedule**

The purpose of this posting is to inform interested parties about plans to reduce available capacity on the Pacific DC Intertie (PDCI) in 2004-05 and to provide the opportunity to address questions and concerns related to this issue.

Deleted: PURPOSE:

The PDCI Participants including Southern California Edison and the Cities of Burbank, Glendale, Los Angeles, and Pasadena are currently working to modernize infrastructure at the Sylmar Converter Station, which is the southern terminal of the PDCI. The Bonneville Power Administration's Transmission Business Line is working to modernize infrastructure at the Celilo Converter Station, which is the northern terminal of the PDCI, in conjunction with the southern terminal work.

	<u>Scheduling Capacity (MW)</u>
April 1, 2004 – September 30, 2004 0800 Hrs PDT	1956 N-S 1904 S-N
September 30, 2004 0800 Hrs PDT – January 1, 2005 0001 Hrs PST	0

Currently, we are in an outage from April 2004 through December 2004. For the first six months of this outage, capacity on the Intertie is 1956 N-S, 1904 S-N MW. For the last three months of 2004, the line will be taken out of service completely and capacity will drop to zero.

On January 1, 2005 the Sylmar Replacement Project will be complete. The PDCI will be placed back in-service with a rated capability of 2990 N-S, 2858 S-N (as before). See schedule below.

January 1, 2005 0001 Hrs PST	2990 N-S 2858 S-N
-------------------------------------	------------------------------

If there are issues related to the outage schedule that customers would like to see considered, please contact Tosh Endo at toshio.endo@ladwp.com.
