Conditions for Acceptance of TSR #83071175

July 22, 2016

The following are conditions for acceptance of this Transmission Service Request (TSR):

1. Service for this TSR delivery point request has been granted on the assumption that (as requested by EKPC) the 1989 Transmission Lease Agreement on file with the Federal Energy Regulatory Commission as LG&E/KU Rate Schedule No. 301 has terminated as of March ___, 2021, and the Transmission Owner has reassumed control of the Louisville to TVA 161 kV circuit that is currently leased to EKPC.

2. Given the five-year lead time between the date that EKPC is requesting service for this delivery point and the date that such service is expected to commence, if future studies performed by either the Transmission Owner or the ITO indicate that that the transmission line should be retired, the Transmission Owner reserves the right to request EKPC to move the delivery point for this load to an alternative source.

This TSR is subject to recall by the ITO if all conditions are not met
