

In order to better manage MEAG's OASIS reservation requests and to improve the transmission services provided, effective **November 1, 2005**, all separate partial reservation requests to link to any existing partial path reservations for the purposes of a Redirect will no longer be accepted. All transmission reservations to be redirected must use the Redirect option under the Request Type when requesting service. All reservations for Redirect will be approved based on the availability of the requested path and MEAG's OATT.

Please withdraw and resubmit any requests for Redirect services queued on MEAG's OASIS for a commencement date after November 1, 2005. Your cooperation will be greatly appreciated.
