

Proposed Transmission Request Submittal Windows in Compliance Filing

Posted Date: July 12, 2007

Effective Date: July 13, 2007

Revision #: 1

In compliance with FERC Order 890 ¶¶1418-1422, Sierra Pacific Power and Nevada Power are proposing the following procedure on transmission service request submittals.

In response to FERC 890 and our ongoing demand for released non-firm capacity, a simultaneous submittal window has been put in place. Non-firm transmission requests received after our release time (as defined in another business practice) within a 5 minute period will be deemed to have been submitted simultaneously. Transmission requests received in that window will be accepted using FERC established priorities for competing reservation requests.

1. Pre-confirmed
2. NERC Priority
3. Longer Duration
4. Higher Quantity
5. Higher Price

Any requests that are identical in the above categories will be accepted on a pro-rated basis.
