Customer: **PGE Merchant**

Subject: **Undesignation of Network Resource**

Question:

If a transmission customer undesignated 400 MW of a dedicated network resource and later decides to increase their undesignation by an additional 100 MW (for a total of 500 MW), what do they need to do to accomplish that?

Answer:

The transmission customer would complete and submit a new Termination of Network Resource form for the additional 100 MW. The amounts contained in the individual terminations are cumulative.
