

December 18-22, 2017

The week of December 18, 2017, the KB pipeline will be installing a main line valve at the heliport located at the Beaver plant site. This work includes mobilization of the crew, hot tapping the line and installing a main line bypass valve.

The evening of December 18th the pressure on the pipeline will be drop to 450 psig and will remain at that pressure for 24 hours. It is expected that the job will be complete by December 21.
