

Public Service Company of Colorado Control Area and Transmission Provider

FERC 890 Related BUSINESS PRACTICES Effective July 13, 2007

GENERAL INFORMATION

FERC Order 890 requires each Transmission provider to provide a means to designate and undesignated network resources (DNR) on a day ahead basis, see FERC Order 890 (Docket Nos. RM05-17-000 and RM05-25-000 para 90 and 385). This procedure addresses the DNR requirements stipulated in Order 890. Until NAESB provides direction to the OASIS vendors this procedure will be utilized to meet the DNR requirements.

Designated Network Resource Procedures

All DNR's must be designated on the OASIS for all network customers. The list of DNR's must include the following:

1. The resource name.
2. Geographic location.
3. Electrical location.
4. Amount of capacity designated.
5. A statement that attests that the resource meets the requirement of Section 30.1 and 30.7 of the pro forma OATT. The statement for each network resource must include that the resources is either 1) owned or there is a commitment to purchase the designated network resource and 2) the designated network resource comports with the requirements for designated network resources.

Prior to July 13th, 2007 each network customer must submit via a fax and an e-mail to Steve Mornis (Steve.Mornis@xcelenergy.com) the initial list of DNR's in conformance with the above requirements. In accordance with FERC Order 890, these DNR's will be posted on the PSCo OASIS.

Beginning on July 13th, 2007, in accordance with Order 890 para 1543 a network customer may un-designate or designate resources utilizing the facsimile forms located in the **FERC 890 Postings** folder on the PSCo OASIS home page. The temporary DNR designation(s) must be submitted by 10:00 am Mountain Prevailing Time (MPT) on the WECC prescheduling day before the start (or end) of the change in resource designation. Transmission rollover rights for resources that are undesignated will be maintained for transmission reservations with a 5-year or more term. The term of any temporary DNR shall not be less than one-day and shall begin at 12 midnight MPT and end at midnight MPT.

Public Service Company of Colorado Control Area and Transmission Provider

DNR designations and designation changes will be verified via a phone call and those that cannot be verified or those that are found to be deficient will be returned to the sending fax with an explanation of the nature of the deficiency. Approval of DNR designations and designation changes will be communicated via a fax to the sending fax number.

Network transmission requests associated with the designation of new resources shall be made on the PSCo OASIS and must state “on-system DNR” or “off-system DNR” in the comments section of the network transmission service request.

DNR Procedures Are Subject To Change

This policy may be modified as needed as Order 890 issues are addressed.

Questions

Questions on this Business Practice should follow the Transmission Customer Q&A procedures accessed via the **Transmission Customer Q&A** link under the **General Information** folder on the PSCO OASIS home page.
