

Puget Sound Energy (PSEI) posts an OASIS path referred to as COLSTRIP-GARRISON. This OASIS path is comprised of three segments, COLSTRIP-BROADVIEW, BROADVIEW-TOWNSEND, and TOWNSEND-GARRISON.

The segments COLSTRIP-BROADVIEW and BROADVIEW-TOWNSEND represent PSEI's contractual share of the Colstrip Project Transmission Agreement which is operated by NorthWestern Energy (NWMT). As the transmission operator, NWMT is responsible for determining the Operational Transfer Capability (OTC) for the Colstrip Project Transmission.

The segment TOWNSEND-GARRISON represents PSEI's contracted rights with Bonneville Power Administration's Transmission Services (BPAT). BPAT is the transmission operator.

From time-to-time, the transmission operator(s) will inform PSEI of revised OTCs. PSEI to the best of its ability will update the corresponding TTCs to reflect these OTC changes. The exact reason for a change in TTC on these paths should be found on the NWMT and BPAT OASIS web sites.
