Posted Study Metrics Q2 2012 in PSEI Transmission Study Metrics subfolder in PSEI Performance Metrics folder on July 2 2012

On June 6 2012, PSE posted its Q1 2012 study metrics in the PSEI Transmission Study Metrics subfolder in the PSEI Performance Metrics folder. The posting of PSE's Q1 transmission study metrics should have been made on or before April 15 2012. The posting was inadvertently missed until June 6th. PSEI Transmission has reviewed its compliance practices and has implemented an automated notification process to guard against any similar recurrence in the future.

Notice: The FERC Office of the Secretary has issued an Order in regards to PSE□s proposed OATT amendments Transmission Formula Rate Case, Docket Nos. ER12-778 & EL12-46. PSE's proposed formula rate decrease for service on the Colstrip and Southern Intertie lines under Schedule 10, and Schedule 1 Scheduling and Dispatch Service have been accepted and placed into effect April 1, 2012. PSE's proposed reclassification of facilities and formula rate for network and point-to-point service on the Washington Area Facilities (Attachment H and Schedules 5,6,7 and 8) have been suspended five months - until September 1, 2012.
Click here for the FERC's order!

Open Access Technology International (OATI) has scheduled an outage of certain systems that will impact e-Tag and TSR processing for several western Transmission Providers and Balancing Authorities. These entities will be able to manually approve and deny both e-Tags and TSRs but automated processes will be disabled during the outage period. The outage is scheduled for Tuesday, April 10, 2012 between 4:15 pm and 5:45 pm (Pacific Prevailing Time).

The following Providers, and associated BAs, if applicable, will be impacted by this event: AVAT, AZPS, BHBE, BHCT, CSU, DGT, EPE, IID, IPCO, NEVP, PGE, PNM, PRPA, PSCO, PSEI, SPPC, SRP, SWTC, TEPC, TIDT, and TSGT.

It is recommended that the submittal of TSRs and e-Tags for the outage period be done in advance of the outage period in order to reduce the volume of requests which will need to be manually evaluated during the outage period.

On February 9, 10, and 13, 2012, PSE transmission approved seven Transmission Service Requests (TSRs) made by PSE merchant that should have been automatically denied by the OASIS. The TSRs requested redirect service from a firm point-to-point service to a lesser quality of service. Because the OASIS product redirect options were not sufficiently limited, it allowed PSE merchant to inappropriately select 6-NN service rather than NS-1 service, which is the appropriate point-to-point secondary service.

PSE transmission corrected the OASIS product redirect options on Monday afternoon, February 13th preventing a further occurrence of this situation.

Because the power was being delivered to load and 6-NN was thus an appropriate type of service, PSE does not believe the inadvertent submission/approval had any impact to any of PSE transmission's other OATT customers.

PSE is posting this notice out of an abundance of caution. Posted Feb 15 2012

In light of the State of Washington experiencing a historic winter storm emergency (Governor Christine Gregoire declared a state of emergency), PSEI posted a notice on January 23rd stating that some OASIS postings were delayed. The delayed posting was PSEI's Q4 2011 transmission study performance metrics, due on January 17th.

In addition, some Generation Interconnection Request Queue process milestones were delayed, including five (5) interconnection studies and one (1) interconnection study agreement.

On January 23, 2012, PSEI posted its Q4 2011 transmission study performance metrics. On February 9, 2012, PSEI updated the "study timeline deviations" on its posted Generation Interconnection Request Queue.

We regret any inconvenience this may have caused our transmission customers. Thanks for your understanding.

January 16 2012 through January 22 2012 PSEI expereinced a series of winter storms including record snow fall, freezing rain, high winds, and some flooding. Over 350,000 electric customers lost power at various times. PSEI has brought in crews from other states and Canada to assist in the resortation processes. PSEI employees of all types have been assisting in various response capacities. Some OASIS postings have been delayed.
