

On 12/16/05, a PSE employee forwarded to PSE merchant function employees, non-public transmission information about a third party transmission provider's system. The e-mail mainly discussed the status of the interconnection of PSE's Wild Horse Wind Project to the transmission system but included, in part, the following text (with certain commercially sensitive information redacted) referencing related work on BPA's system:

"2) BPA has completed their detailed studies and has concluded (as of today) that they will be *[redacted text]*. BPA will complete this *[redacted text]* work, *[redacted text]*, consistent with the needed schedule for Wild Horse."
