

Tag Validation Update

	OATI Tag Validation	Tag Deny Reason
1	Energy profile exceeds transmission allocation	Energy Profile > Trans Alloc
2	Ramp duration does not match standard ramp for WECC. Currently set to 10-minutes - should be fixed for WECC ramp in the future.	Non-Standard Ramp duration
3	Ramp Start/Stop time is not within the time range encompassed by the energy segment	Ramp start/stop time
4	Status of OASIS reservation is not confirmed	Resv Status not confirmed
5	Transmission allocation exceeds OASIS reservation	Tag MW > Avail resv MW
6	Transmission allocation NERC priority does not match product level purchased through OASIS	NERC and Resv Priority differ
7	Tag source/sink does not match OASIS reservation source/sink	Source/sink
8	POR/POD on a single row inconsistent with path names defined in OASIS	Segment POR/POD
9	Physical Segment PSE on tag does not match transmission customer in OASIS	Phys Path PSE diff from resv
10	Allow secondary NF	Secondary NF
11	Transmission Allocation PSE (Transmission Customer) on tag does not match transmission customer in OASIS	Trans Cust diff from resv
12	Transmission allocation on tag is using an OASIS reservation that has been Recalled	Can't tag against RECALL resv
13	Transmission allocation 1 st POR and last POD using a given aref do not match path name reserved in OASIS	Path POR/POD diff from resv
14	ATC Committed checks that non-firm committed ATC is zero or greater	Insufficient ATC Commit
15	ATC Pending checks that non-firm pending ATC is zero or greater	Insufficient ATC Commit
