

wesTTrans OASIS
TEPC OASIS

Changes to Hourly Transmission Service:

Effective February 8, 2005, the Hourly Transmission Service products on TEP's OASIS have changed. There will no longer be a service called Non-Firm Hourly On-Peak and Non-Firm Hourly Off-Peak. The product will be Hourly Non-Firm, .

The Hourly Non-Firm Full Period allows customers to schedule transmission over a series of hours that contain a combination of both on-peak and off-peak hours. The transmission reservation process for Hourly Non-Firm Full Period allows customers to submit one reservation rather than the multiple reservations needed under the current services. Hourly Full Period service minimizes customer confusion and reduces the workload for both the customer and the transmission service provider, again, promoting efficiency within the market.

The westtrans OASIS system automatically totals invoices for transmission service accounting for those hours that were on-peak at on-peak prices and those hours that were off-peak at off-peak prices during the requested Hourly Non-Firm Full Period.
