

## **Large Generator Interconnection Queue Cluster Window Notice**

In accordance with the provisions set forth in Section 4.2 Clustering of Attachment I-3 (the “Large Generator Interconnection Procedures”, or the “LGIP”) to the Tucson Electric Power Company Open Access Transmission Tariff, Fourth Revised Volume No. 2, dated July 13, 2007, as amended, TEP has elected to evaluate Interconnection Requests, submitted in accordance with the LGIP, utilizing clustering for the purpose of conducting the Interconnection System Impact Study. TEP’s annual Queue Cluster Windows shall be as follows:

January 1<sup>st</sup> through March 31<sup>st</sup>  
April 1<sup>st</sup> through June 30<sup>th</sup>  
July 1<sup>st</sup> through September 30<sup>th</sup>  
October 1<sup>st</sup> through December 31<sup>st</sup>

The first Queue Cluster Window will begin January 1, 2010

All capitalized terms used in this notice and not otherwise defined herein shall have the meanings ascribed to such terms in the LGIP.

**NOTE: TEP will proceed with the Interconnection System Impact Study in accordance with Section 7.4 Interconnection System Impact Study Procedures of the LGIP for all Interconnection Requests in which an Interconnection System Impact Study Agreement has been executed during the Queue Cluster Window.**
