FERC Order 890 Planning Strawman Proposal posted under General Information

**April 16, 2007**

**New Tariff Revisions Effective May 1, 2007**

Western Area Power Administration (Western) has filed a revised Open Access Transmission Tariff (Tariff) with the Federal Energy Regulatory Commission. Western updated certain Tariff provisions, adopted the principal features of the Commission's Standard Small Generator Interconnection Procedures (SGIP) and Standard Small Generator Interconnection Agreement (SGIA) consistent with applicable law, added the pro forma wind generator interconnection technical procedures and requirements from FERC Order Nos. 661 and 661-A, and made additional changes to further Western's mission and transmission marketing efforts. These revisions become effective as of May 1, 2007.

The revised Tariff, a summary of changes made to its existing Tariff, and information about the tariff revision process is posted on Western's Web site at <http://www.wapa.gov/transmission/oatt.htm>
