

Grandfathered Designated Network Resources to Serve TVA's Native Load Customers

Any TVA generating plants and uprate projects that are operational as of August 1, 2003 are designated network resources to serve TVA's native load customers, consistent with Section 30.1 of TVA's Transmission Service Guidelines. Additionally, any power purchases with executed contracts that meet the criteria for designation of network resources under TVA's Transmission Service Guidelines as of August 1, 2003 are also designated network resources to serve TVA's native load customers.
