

**Short-Term Firm Transmission Service
Business Practice, Effective March 1, 2001**

All requests submitted to TVA for Short-Term Firm transmission service where any part of the service period extends beyond the time frame within which Available Transfer Capability is posted on OASIS will be invalidated by TVA, except where the customer requests that a System Impact Study be performed relating to these Short-Term Firm requests. In order to receive a System Impact Study for Short-Term Firm service, the customer must make a notation to that effect in the customer comment field when the transmission service request is submitted on OASIS. TVA will then follow normal business practice as relates to System Impact Studies for these requests. TVA will continue to process Short-Term Firm requests that fall entirely within the time frame for which ATC is posted on OASIS by either granting or refusing the request based on the Available Transfer Capability for the requested service period.
