			Note (3)	405,000	405,000

Notes

(1) Installed Capacity is Generator Nameplate Capacity

(2) Temporary Undesignation

(3) Total SEPA designated capacity is 405 MWs for the system. It is not plant/unit specific.

(*) Asterick denotes resources designated via a Transmission Service Reservation. All other resources are grandfathered. Any TVA generating plants and uprate projects that were operational as of August 1, 2003 are designated network resources to serve TVA's native load customers, consistent with Section 30.1 of TVA's Transmission Service Guidelines. Additionally, any power purchases with executed contracts that meet the criteria for designation of network resources under TVA's Transmission Service Guidelines as of August 1, 2003 are also designated network resources to serve TVA's native load customers.

**Tennessee Valley Authority Network Customer's
Designated Network Resources**

Resource Name	Geographical Location	Electrical Location	Total Installed Capacity (kW) (1)	Capacity Designated as Network Resource (kW) (2)
