Notes

- (1) Installed Capacity is Generator Nameplate Capacity
- (2) Designated Capacity is Winter Net Dependable Capacity
- (3) Total SEPA designated capacity is 405 MWs for the system. It is not plant/unit specific.
- (*) Asterick denotes resources designated via a Transmission Service Reservation. All other resources are grandfathered. Any TVA generating plants and uprate projects that were operational as of August 1, 2003 are designated network resources to serve TVA's native load customers, consistent with Section 30.1 of TVA's Transmission Service Guidelines. Additionally, any power purchases with executed contracts that meet the criteria for designation of network resources under TVA's Transmission Service Guidelines as of August 1, 2003 are also designated network resources to serve TVA's native load customers.

Tennessee Valley Authority Network Customer's Designated Network Resources

Resource Name	Geographical Location	Electrical Location	Total Installed Capacity (kW) (1)	Capacity Designated as Network Resource (kW) (2)

Tennessee Valley Authority Short-Term Designated Network Resources

Resource Name	Geographical Location	Electrical Location	Total Installed Capacity (kW) (1)	Capacity Designated as Network Resource (kW) (2)
---------------	-----------------------	---------------------	---	--

All **TVA Short-Term Designated Network Resource** (DNR) requests are posted on the TVA Oasis Node in current or archive sections for viewing.

To query:

Visit the TVA OASIS Node: [Click Here ----> www.oatioasis.com](http://www.oatioasis.com)

Under the "**Reservations**" section, select the following filters to view TVA short term "DNR" requests:

TP=**TVA**

Type = **Network**

Select desired - Incr (Increment = Hourly, **Daily**, Monthly, ALL)

Select desired - Class (**Firm**, Nonfirm)

Select desired - Time (**Active**, Start, etc) and duration (All, Today forward, **User Range** 1/1/2007-1/1/2008)

Press "**Enter**" for output to be displayed or for download option.
