

New NCA

On November 20, 2006 the Midwest ISO proposed to designate as a Narrow Constrained Area (NCA) an electrical area that includes portions of northern Iowa, southwestern Wisconsin, and southeast Minnesota. In the attached order, the Commission accepts for filing the proposed designation of a new NCA, effective January 19, 2007. This will be placed into effect at midnight tonight. If you have any questions, please contact your customer service representative.
