

2308 Hourly Transmission Outage Report (05/31/07)

The Midwest ISO experienced technical difficulties that impacted the availability of data for the Transmission Outage report (PDF and XLS format) found on OASIS. As a result, information for 1400-1700 EST (please confirm that it's 1400-1700 EST and not 1300-1600 EST) is unavailable or incorrect. Notification will be provided if additional hours are impacted.

We appreciate your cooperation as we work to resolve this issue.
