

Intra-Hour Physical Scheduling Changes

As announced at the Market Subcommittee June 2, 2009, the Midwest ISO will implement a recommendation made by the Independent Market Monitor in its State of the Market report. As of 12:00 (EDT) on Monday, June 8, the Midwest ISO will disallow any non-reliability physical scheduling within the current operating hour. Once the operating hour begins, any new requests for interchange, or any requests to modify already implemented interchange, will be denied by the MISO Scheduling department.

If you have any questions, please call the Real Time Scheduling desk at (317) 249-5511.
