

2308 and 2309 Outage Reports (06/15/07)

The Midwest ISO will perform system maintenance from 1330-1800 EST on Sunday, June 17, 2007.

During this time the following Midwest ISO reports, normally found on the OASIS site (<http://oasis.midwestiso.org/oasis/miso>), will not be created or posted:

- Hourly Transmission Outage Report (2308)
- Real-Time Transmission Outages Report (2309)

Once maintenance has been completed reports will resume publication on their regular schedule.

We appreciate your patience during this matter.
